SKILLS

Languages

- C#
- TypeScript
- CSS/HTML
- SQLite

Frameworks/Tools

- Angular
- Gulp
- WordPress
- Node.js, NPM

Source Control

- Mercurial (Hg)
- Git

Applications

- TeamViewer / VM
- Autodesk 3ds Max
- Blender
- Visual Studio/Code

EXPERIENCE

Dec.
2017
|
Sept.
2017

Front End Software Development

Imagine Communications

📍 Waterloo, Ontario

- Worked on a touchscreen based web application that serves as a software version of fixed Control Panel
- Set goals for performance and deadlines that upholds the companies standards
- Maintained and added features to existing applications with large codebase
- Worked closely with QA and technical support teams to resolve issues identified by internal testing

PROJECT DEVELOPMENT

|
May
2018

Cross Platform Event Manager

Conestoga College

- Created a cross platform web application using Angular5, TypeScript, Cordova, and Ionic that could be used for scanning student information as they entered and left school events
- The UI consisted of two views, one for students to see what events they are registered for and attended the other view for administration to view who all attended there organized events
- Our group won 'Best Final Project of the Year' and 'Computer Applications Development Capstone Project Award' awards for Summer 2018.

2015

Wix/3D Modeling

Hobby

- Used Wix web development software to build a free website to show off 3D models
- While using Blender's 3d production pipeline to develop custom game models, I was intrigued by the underlining software that made my models come to life

EDUCATION

Dec.
2018
|
Jan.
2018

Computer Applications Development

Conestoga College

📍 Kitchener, Ontario

- Learned the technical skills for web, mobile and database application development, as well as systems analysis and design
- Learned about the life cycle of programming development including Agile and Scrum methodologies
